

## Herrmans Safety Wing

Encourage motorists to give you a little extra room when passing with Herrmans Safety Wing. This EU-approved safety device is an orange arm with a 2.25" white reflector on one side and a red one on the other. Attach the Safety Wing to the left-side chainstay with the included hardware. In use, it extends 12" perpendicular to your bike, increasing your visibility to drivers and politely asking for more space. When not in use, it folds rearward against the chainstay. The Safety Wing is available through Cantitoe Road for \$15. Made in Finland. [www.cantitoe-road.com](http://www.cantitoe-road.com) >
